

Time

Correlation

Summary

```
graph LR; Time([Time]) --> Summary([Summary]); Correlation([Correlation]) --> Summary;
```

The diagram illustrates a process where two inputs, 'Time' and 'Correlation', are combined to produce a 'Summary'. 'Time' and 'Correlation' are each enclosed in a thin black oval. Two arrows originate from the right side of these ovals and point towards a larger, thick-bordered oval on the right labeled 'Summary'. The 'Summary' oval is significantly larger and has a much thicker border than the input ovals, and its text is in a bold serif font.
